## Professional Summary

Organized and dependable candidate successful at managing multiple priorities with a positive attitude. Willingness to take on added responsibilities to meet team goals.

## Introduction

As a graduate in aeronautics, I am seeking a stimulating opportunity to leverage my expertise in Computational Fluid Dynamics (CFD) and meteorology, combined with a strong passion for performance. I am a dynamic individual with excellent problem-solving skills and a proven ability to thrive in collaborative team environments.

## Skills

- **Organization and Time Management:** I excel at planning and managing multiple tasks simultaneously, a skill honed during my years in flight planning and aircraft maintenance management.
- **Problem-Solving:** I possess strong analytical and problem-solving skills. I am adept at identifying and resolving complex issues, as demonstrated by my success in troubleshooting aircraft technical malfunctions.
- **Technical skills:** CAT A (basic), knowledge of avionics systems, reading technical diagrams, use of measuring instruments, aeronautical maintenance software (e.g., AMOS).
- **Effective Communication:** I am a strong communicator, both verbally and in writing. My experience coordinating with flight crews and authoring technical reports has refined my ability to convey information clearly and concisely.
- **Adaptability:** I am highly adaptable and possess a strong ability to quickly learn new skills. This was evident during my successful transition from a pilot to an aircraft maintenance technician role.
